

I do not want the Indiana privacy call laws changed to allow more unwanted solicitations. We are pleased with the reduction in these calls and wish this system to continue as it now is implemented.

Our interruptions are minimal and we are glad we signed up for this no call list. If you wish to exclude certain groups such as law enforcement agencies, certain legitimate charities, etc., that may be tolerable; however, allowing pre-existing contacts to continue to harass us with telephone pricing, credit card plans, health/auto insurance options is NOT acceptable. The mail we receive is becoming a problem since these companies cannot call us any more. What would exclude them from calling if they have our address on an old mailing they currently are using?

PLEASE do not try to fix a problem that is not broken. It is fixed by the State of Indiana, and fixed well.
